## SKILLS

- JavaScript
- Node.Js
- Express.Js
- HTML5
- CSS3

- Bootstrap
- ReactJs
- jQuery
- Heroku
- Postman

- Tailwind
- Git
- Github
- Linux
- Sass

- API
- MongoDB
- MySQL
- CockroachDB
- Ajax

## EXPERIENCE

### Weather App | "[Link](#)"
- Build a fully responsive forecast web server that provides accurate weather information for any given location
- Utilized asynchronous non-blocking Node.js to create a fast and responsive web application
- Integrated WeatherStack APIs to retrieve instant and accurate weather information, and Mapbox APIs to obtain precise location data
- Developed using Express.js, HTML, and CSS to provide a user-friendly and aesthetically pleasing interface
- Demonstrated proficiency in working with APIs, implementing responsive design, and using server-side frameworks to build web applications

### Omnifood | "[Link](#)"
- Build a fully responsive web application for a premium food delivery company
- Developed the project end-to-end using HTML, CSS, and jQuery framework to create a modern and aesthetically pleasing user interface
- Utilized jQuery to create animations that enhanced the user experience and provided seamless transition and animation to the page
- Successfully deployed the application to Heroku cloud platform
- Demonstrated proficiency in front-end development, including responsive design and animation.

### Noteables | "[Link](#)"
- Developed a web application for creating and managing notes and lists using Python(Django), HTML, CSS, and JavaScript
- Utilized third-party services (APIs) to import the TinyMCE editor with Python on the backend, and JavaScript for the client-side validation, demonstrating proficiency in integrating third-party tools into web application
- Designed and implemented a user-friendly interface using HTML and CSS, highlighting strong front-end development skills
- Collaborated with team members to plan and execute the project, showcasing strong communication and teamwork skills

### Dice Tavern App | "[Link](#)"
- Role-playing-inspired web application that pits players against each other in a dice-themed game
- Implemented game logic using JavaScript to create a challenging and strategic experience
- Designed the user interface using HTML and CSS, with a focus on user experience and accessibility
- Developed wireframes and unique user stories to guide the development process
- Demonstrated strong problem-solving and critical thinking skills to troubleshoot issues and optimize performance

## EDUCATION & CERTIFICATIONS

**Udemy (Jonas Schmedtmann)** - Build Responsive Real-World Website with HTML and CSS          *12/2020 - 05/2021*

**Udemy (Andrew Mean, Rob Percival)** - The Complete Node.js Developer Course (3rd Edition)          *05/2022 - 04/2023*

**Udemy (Jonas Schmedtmann)** - The Complete JavaScript Course 2023: From Zero to Expert          *10/2023 - Current*

**Udemy (Maximilian Schwarzuller)** - React the Complete Guide (incl Hooks, React Router, Redux)          *01/2024 - Current*
