INTRODUCTION

Resourceful Full Stack Web Developer bringing in-depth knowledge of the latest technology trends to produce clean website design. Highly skilled in handling complex HTML, CSS, and JavaScript coding, design, and extensions to meet the organization's needs. Eager to leverage excellent communication, relationship management, diverse experience, and technical skills to a software team.

TECHNICAL PROJECTS

Dice Tavern App - [Link](#) | [Github](#)
A dice-themed, role-playing-inspired web application that pits the player against the player. Not for the faint of heart, this game requires strategy and a mix of luck in preparing your avatar for battle.
- Game actions and logic utilized both Javascript and Python
- UI design centered around HTML and CSS
- Developed wireframes, and unique user stories

Noteables - [Link](#) | [Github](#)
A sleek web application that simplifies the creation and management of notes.
- Django authentication model, templates, bootstrap styles, and encryption to ensure user security
- Dashboard where logged in users can create, manage, sort, and delete their notes
- WYSIWYG text editor allowing for Rich Text formatting and backend database storage
- Login/Registration system

OmniFood - [Link](#) | [Github](#)
A fully responsive web application of a premium food delivery company.
- Built a beautiful modern web application end-to-end using Html, CSS, and jQuery framework.
- Utilized jQuery to create a modern animation for a user-friendly experience.
- Leverage a third-party API to create a submitting form, and final deployment with Heroku.

Weather App - [Link](#) | [Github](#)
A Forecast web server, which has accurate weather information for any given location.
- Built an asynchronous non-blocking Node.js web application.
- Retrieve instant, accurate weather information with Weatherstack APIs, and precise location with Mapbox APIs.
- Application built with Express.js, HTML, and CSS.

EXPERIENCE

Carpenter / Furniture Designer - Freelancer   **2015 - Present**
- Repaired and maintained old furniture to give pieces new, improved looks.
- Used scrap wood, textiles, metals, and stones to create sample pieces and test materials.
- Prepared sketches and freehand designs for various types of furniture.

Nostos Restaurant -Server & Bartender   **2016 - Present**
- Delivering high-quality customer service in a fast-paced environment while displaying knowledge in both fine dining and culture
- Offering services to elevate sales opportunities to ensure repeat customer business
